PROJECTS

Social Media Web App View

Tech Stack: Next.js, Tailwind CSS, MongoDB, JWT Authentication
- Built a social media-style web application where users can create, share, and view posts, interact with likes and comments, and explore other users' profiles.
- Implemented secure authentication using JWT (JSON Web Tokens) with access & refresh token flow, ensuring safe and persistent user sessions.
- Designed a responsive and modern UI with Tailwind CSS, providing a smooth user experience across devices.
- Created RESTful API routes in Next.js for user management, post creation, likes, and comments, integrating them seamlessly with MongoDB.
- Used MongoDB with Mongoose to model users, posts, and comment data.
- Deployed the application on Vercel with environment variables for secure production setup.
